

A revolutionary car cover

OAKVILLE, ON — Willpak Industries Inc., manufacturer of the Astra/Hammond line of automotive accessories has acquired the assets of Touchless Concepts of Costa Mesa, California, including the revolutionary Touchless Car Cover.

The Touchless Car Cover, a universal car cover, was introduced at the Pebble Beach Concours in 2008 and through this was invited by Jay Leno to his garage in Burbank, California for a personal and up-close demonstration. Needless to say he was impressed — his first words, “boy is this a cool product...” would set the standard.

This revolutionary design took years of time, determination and creativity by two men with a boundless affection for automobiles, both determined to find solutions to problems created with usage of standard car covers. Refinement of prototype also included ideas from legendary late night host and car enthusiast, Jay Leno. “We made two additional revisions to the Touchless Car Cover after visiting Jay Leno’s Garage in Burbank, California, we wanted to make sure that our revolutionary design was completely refined before coming to the market place”, said creators/designers Rick Hartbrodt and Brett Hemphill.

Unlike with standard car covers, the Touchless Car Cover allows the vehicle to dry naturally and without an accumulation of dust, preventing the possibly of mold and bacteria growth.

It takes the average car approximately 18 to 30 hours to completely dry, depending on ambient temperature (in colder climates or winter temperatures drying time can more than double). In this time a car can accumulate enough dust on its surface that a typical cover can scratch the paint finish, no matter how soft the fabric of the cover is.

No dust. No trapped moisture. No chance for mold to grow.

Protect your car and its beautiful paint job with the Touchless Car Cover.

The Touchless Car Cover is made of 190T nylon that has been coated for UV protection and water resistance. The intuitive folding design makes for easy usage and storage. A highlight of the design is the zippered side openings that allow you access to your vehicle when the cover is in use.

NINE GREAT REASONS TO PURCHASE THE TOUCHLESS CAR COVER!

- Ease of use
- No damaged paint due to scratches from dust or dirt
- No dirty and smudged windows
- Easy storage
- Zippered sides - access to car with cover in place
- No metal parts to rust or corrode
- Drive in and out - easy to set up and use!
- Universal front / rear skirts
- Universal size – fits sedans, coupes, sports cars and wagons up to 196" in length
